**DETAILED ACTION**

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims 1, and 10 recite a RF device for integration with conductive, dielectric materials comprising a radio component, an antenna connected to the radio component, an adhesive coating covering at least the antenna, an insulating layer attached to the antenna by the adhesive coating, the insulating layer configured to insulate the antenna from the conductive, dielectric materials, and the insulating layer having a relative dielectric constant less than the relative dielectric constant of the conductive, dielectric materials.

Claim 17 recites a method for assembly a RF device for use with a tire comprising the steps of providing a radio component, providing an antenna connected to the radio component, coating at least the antenna with an adhesive, and applying an insulating layer to the antenna for attachment by the adhesive coating, the insulating layer configured to insulate the antenna from the tire, and the insulating layer having a relative dielectric constant less than the relative dielectric constant of the tire.

None of the prior arts shows or suggests the device and method for assembly a RF device for use with a tire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
